Chat bot Assistant

User Guide

Gideon

How to Use Gideon

1. **Start the Chatbot**

   - Open the link provided to access the Gideon chatbot

   - You'll be greeted with a welcome message and a menu of options

2. **Choose What You Want to Do**

   - 📘 Learn Something → explore AI topics

   - 📝 Take a Quiz → test your knowledge

   - ❓ Ask a Question → ask anything about AI or ML

3. **Learning Section**

   - Click on a topic to receive a short lesson

   - Topics include NLP, Neural Networks, Ethics, and more

4. **Quiz Section**

   - Answer each multiple-choice question

   - Get instant feedback with emojis 😁 / 😔

5. **Ask a Question**

   - Just type your question (e.g., "What is NLP?")

   - Gideon will provide a concise, accurate response

6. **Unsupported Questions**

   - If you ask something unrelated, you'll get an error message like:

     "🤖 Oops! Gideon's trained only on AI stuff. Please ask something related to AI or Machine Learning."

7. **Theme & Interaction**

Author: Emmanual R. Januarie

- The UI follows a dark theme
- Interaction is clean, mobile-responsive, and supports multimedia
